Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 12 April 2007.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 287-321 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.

DETAILED ACTION

Applicant's election with traverse of Group I in the reply filed on 4/12/07 is acknowledged. The traversal is on the ground(s) that the dye and labeled target were not restricted in parent application 10/096075. This is found persuasive and all claims have been examined.

Specification

The disclosure is objected to because of the following informalities: In page 1, the paragraph related to cross references is missing the serial numbers.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 287-321 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 287, for example, is vague and indefinite because of the recitation of the "capable of". It is unclear whether the claimed reactive group R actually does provide a conjugated system or an electron delocalized system, because having the capability is not the same thing as actually performing the function. A positive recitation is required.

Claim 303, for example, is vague and indefinite because of the recitation of the "capable of forming a carbon-carbon linkage". It is unclear whether the claimed reactive group R actually does form the carbon-carbon linkage with the target, because having the capability is not the same thing as actually performing the function. A positive recitation is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 287-291, 294-311, 314-321 are rejected under 35 U.S.C. 102(e) as being anticipated by Ju et al. US 6,664,079.

Ju et al. discloses a dye composition comprising a fluorescent dye linked to a moiety comprising an aromatic group which comprises a nitro substituent and an unsaturated group. Said composition is covalently attached to a target via a carbon-carbon linkage. Said target can be a nucleotide analog. The unsaturated group can be an alkyne group. The dye can comprise a charged or polar group, which inherently increases solubility. (See Figure 7).
